. . . in collaboration

Data Science | Lancaster University

94 co-authors over almost 11 years.

Advice

Data Science | Lancaster University

- Get to know yourself
- Be bothered about you (not about what others think/do)
- Most people don't have a career plan all worked out
  . . . and that's ok!
- Priorities and interests change, allow yourself to adapt.
- Work-life balance is averaged over time
- Be kind to yourself . . . and others along the way.
